Make a donation to Irving's care  
at [www.RBARI.org](http://www.RBARI.org)

*Irving is a very friendly fellow who deserves to find his forever home and adjust to his blindness with a family who loves him just the way he is.*

Irving came to RBARI in March 2007. Poor Irving has not been lucky enough to find a family of his own yet, but the staff and volunteers all love him. In fact, Irving has so many friends that take interest in him that it was not long before we noticed poor Irving was having some difficulty with his night vision and focusing his sight on the important things like treats! Irving visited a Canine Ophthalmologist who confirmed our suspicions and diagnosed Irving with PRA, Progressive Retinal Atrophy. We expect that Irving will be

completely blind within 6 months to 1 year. PRA is not a painful disease and does not affect any other part of the body. There is no medical or surgical therapy available for treatment. Irving will be able to adapt to his blindness and still live a happy life with the right family. In order to facilitate his adjustment into a new home, RBARI will provide Irving's new family with 2 lessons from a highly reputable trainer as well as a guide suggested by his Ophthalmologist. If you have enough room in your heart for this special guy please visit us as soon as possible so we can get Irving off on the right start in his new life.
